

New poll shows Northwest voters value clean, reliable, renewable, climate friendly hydropower

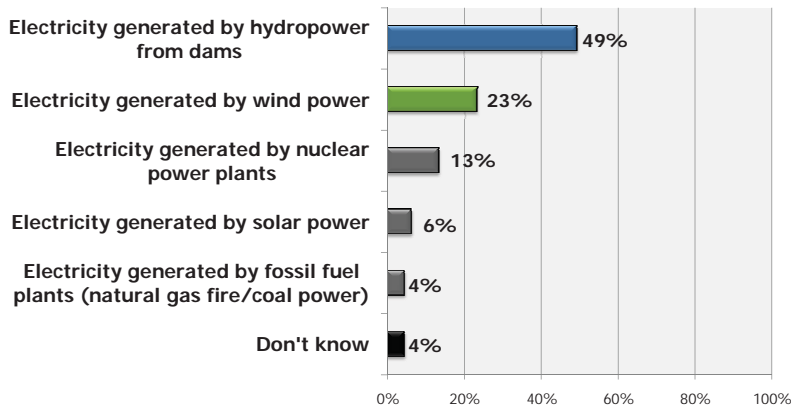

Hydropower and Climate Change

Is it your understanding that electricity generated by hydropower from dams does or does not contribute to global warming or climate change?

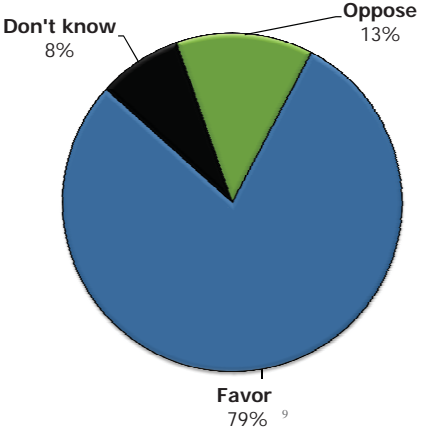

Most Practical Renewable

Of those different energy sources, which one do you think is the most practical source for the Pacific Northwest to rely on for *most* of its energy needs?

Favor or Oppose Declaring Hydro Renewable

The United States Congress and some state legislatures have specifically declared that solar and wind generated electric power are renewable energy sources. Would you favor or oppose the United States Congress and your state legislature including electricity generated by hydropower from dams as a renewable energy source?

View of Wind Power Practicality

Do you agree or disagree with the following statement:

"Developing wind power for the Northwest is a good idea, but counting on wind power to replace the electricity generated from dams is risky because wind power is available only when the wind is blowing."
